

CODEBOOK FOR DATA IN REPLICATION FILES FOR

Racial Social Norms among Brazilian Students: Academic Performance, Social Status and Racial Identification

Alysson Portella - Charles Kirschbaum - Naercio Menezes-Filho

Contact: Alysson Portella (alyssonportella@gmail.com)

id_student

Student ID. Used to merge with friendship networks data

id_interview

Interview ID. Only for students that actually answered the questionnaire.

age

students' age in years by the time of the interview

birth_year

Students' birth year

gender

Students gender. Factor variable in portuguese. Feminino = Female; Masculino = Male

race

Students' race. Categorical, with numeric values representing each of the following races in English and original in Portuguese in parenthesis:

1 = white (*branco*)

2 = black (*negro*)

3 = brown (*moreno*)

4 = yellow/Asian (Amarelo - descendência asiática, como japoneses e chineses).

5 = indigenous (Indígena)

6 = other - specify (Outro - especifique)

skin_color

Students skin color, based on a palette of color shown to them, ranging from 1 (lightest) to 15 (darkest). The palette was shown in the form of 15 dolls of the same format, but with different skin colors. An image can be viewed in the Supporting Information in the paper.

q9, q12, q57 and q60

Students were shown the following preamble to variables **q9**, **q12**, **q57** and **q60**:

For us, it is very important to know your opinion on the following statements. Please, tell us how much do you agree or disagree with these new statements, based on the emoticons below: Strongly disagree, disagree, agree, Strongly agree.

[In Portuguese: Para nós, é muito importante conhecer a sua opinião sobre novas afirmações. Por favor, diga-nos o quanto você concorda ou discorda com cada afirmação, de acordo com as carinhas abaixo. Discordo completamente, discordo, concordo, concordo completamente]

q9: "I don't care if I have white or black friends",

q12: "White people can generally get better jobs than black people can, because white people is more disciplined regarding companies rules"

q57: "In a democratic society, black people should behave like most white people do"

q60: "Black people are generally less concerned with work than others are"

grade

The grade students' are enrolled, ranging from 6th to 12th grade (sixth grade in *Ensino Fundamental* to 3rd grade in *Ensino Médio*)

young_adult_educ

Whether students are enrolled in special classes for youth or adults.

age_group

Whether students are older than 19 years old.

male

Students' gender, recoded so 1 is male

high_school

Whether students are in High School (*Ensino Médio*)

class_id

Classroom ID

school_id

School ID

male_imputed

Gender information, filling in missing information based on students's given name. First names in Brazil are generally gendered.

LP_grade

Students' grades in Portuguese assignment, ranging from 0 to 10 (LP = *Língua Portuguesa*).

MAT_grade

Students grades in Mathematics, ranging from 0 to 10

HIST_grade

Students grades in History, ranging from 0 to 10

GEO_grade

Students grades in Geography, ranging from 0 to 10

EDFIS_missing

Whether students attended Physical Education classes.

EDFIS_grade

Students grades in Physical Education, ranging from 0 to 10

ING_grade

Students grades in English, ranging from 0 to 10

ART_grade

Students grades in Arts, ranging from 0 to 10

FIS_grade

Students grades in Physics, ranging from 0 to 10

QUI_grade

Students grades in Chemistry, ranging from 0 to 10

BIO_grade

Students grades in Biology, ranging from 0 to 10

FIL_grade

Students grades in Philosophy, ranging from 0 to 10

SOC_grade

Students grades in Sociology, ranging from 0 to 10

CIEN_grade

Students grades in Sciences, ranging from 0 to 10

missing_wo_edfis

Number of missing grades, without counting grades in Physical Education

school_situation

Situation at school by the end of the year

1 = Approved

2 = Failed

3 = Failed due to absenteeism

4 = Dropout

5 = Transfer

code_egg_father and **code_egg_mother**

EGP codes:

1 = Higher Controllers

2 = Lower controllers

3 = Routine Nonmanual

4 = Lower Sales-Services

5 = Self-employed with employees

6 = Self-employed with no employees

7 = Manual Supervisor

8 = Skilled Workers

9 = Unskilled Workers
10 = Farm Labor
11 = Self-employed Farmer

no_work_father and **no_work_mother**

Whether parents were classified as not working, either due to unemployment or retirement

race_simple

1 = white, 2 = black, 3 = brown, 4 = other

negro_na

0 = white, 1 = black or brown

race_simple_factor

Factor variable for race_simple

race_factor

Factor variable for race

negro_na_label

Factor variable for negro_na

religion_simple

1 = Catholic, 2 = Evangelical, 0 = Other

schooling

Years of schooling

age_grade_distortion

age - schooling - - 6

scores_poverty

A score estimated using Exploratory Factor Analysis on variables that intend to capture families' poverty level.

score_study

A score estimated using Exploratory Factor Analysis on variables that intend to capture the importance of study for children.

score_racism

A score estimated using Exploratory Factor Analysis on variables that intend to capture inclination towards racist positions by children.

score_homophobia

A score estimated using Exploratory Factor Analysis on variables that intend to capture inclination towards homophobic positions by children.

score_parents_support

A score estimated using Exploratory Factor Analysis on variables that intend to capture how much children feel supported by their parents.

score_self_esteem

A score estimated using Exploratory Factor Analysis on variables that intend to capture children's self-esteem.

score_climate_school

A score estimated using Exploratory Factor Analysis on variables that intend to capture the overall social climate children feel at their school.

score_violence_school

A score estimated using Exploratory Factor Analysis on variables that intend to capture how children feel about violence in their school.

score_neighborhood_quality

A score estimated using Exploratory Factor Analysis on variables that intend to capture the quality of the neighborhood where children live, with respect to safety and wealth.

scores_sdo_1 and scores_sdo_2

Scores for Social Dominance Orientation constructed using the scores predicted in Exploratory Factor Analysis that allows for two factors. The first correlates with anti-equality inclination, while the second corresponds to dominance.

dominance_score

Same as before, but using only one factor and restricting the items to a subsample that contains the items that loaded heavier on the second factor in the previous analysis.

anti_equality_score

Same as before, but using only one factor and restricting the items to a subsample that contains the items that loaded heavier on the first factor in the previous analysis.
